METRO GENERAL HOSPITAL - EMERGENCY DEPARTMENT ADMISSION NOTE
Patient Name: David Miller
Age: 54 years | Sex: Male
Admission Date: 2026-10-18

CHIEF COMPLAINT:
Substernal chest pressure radiating to the left arm for 2 hours.

HISTORY OF PRESENT ILLNESS:
Mr. David Miller is a 54-year-old male with a history of essential hypertension and type 2 diabetes mellitus who presented to the Emergency Department with acute onset substernal chest pressure \(7/10 severity\) associated with mild diaphoresis and exertional dyspnea. Patient denies fever, cough, syncope, or hemoptysis.

PAST MEDICAL HISTORY:
- Essential hypertension \(diagnosed 6 years ago\)
- Type 2 diabetes mellitus \(diagnosed 4 years ago\)

SOCIAL & FAMILY HISTORY:
- Tobacco use: Former smoker \(quit 5 years ago, 15 pack-year history\).
- Alcohol use: Occasional social alcohol use.
- Family History: Father had myocardial infarction at age 62.

INITIAL ASSESSMENT & PLAN:
1. Acute Non-ST elevation myocardial infarction \(NSTEMI\) - admit to Cardiology telemetry, start dual antiplatelet therapy and heparin infusion.
2. Essential hypertension - monitor blood pressure and initiate beta-blocker.
